Technical Skills

Languages: HTML, CSS, Javascript, ES6, MySQL, Jest

Frameworks: Bootstrap, jQuery, Node, Express,

Projects

Exploration Food: <https://joepall.github.io/Exploration-Food/> | <https://github.com/JoePall/Exploration-Food>

Selective recipe application designed to match the needs of all diets and food restrictions. Great for those with allergies, religious restrictions, or are simply particular about their food. Will present users with an exciting new recipe generated based on their personalized profile!

Cocktail_Coterie: <https://cocktail-coterie.herokuapp.com/> | https://github.com/AuroraBrune/cocktail_coterie

Full-stack Application that seeks to make virtual socialization convenient and fun! Cocktail_Coterie allows the user to make a profile, search & save cocktails, and create a shareable party invitation that includes a chosen cocktail (with an ingredient list & instructions), as well as a zoom link.

Tracking Employees: <https://drive.google.com/file/d/1TzfOYUix2iAlO2PA8VHzlyDNyqHatiir/view> | <https://github.com/AnthonyStembreit/Tracking-Employees>

Command-Line application that functions as a content management system for a business who has multiple departments, roles, and employees to manage. Gives administrator ability to create employees, roles, and departments; to view employees by role, department, or manager; and to change an employees role or manager.
